POWER-MASTER "PILE DRIVER" MATERIAL PUMPS

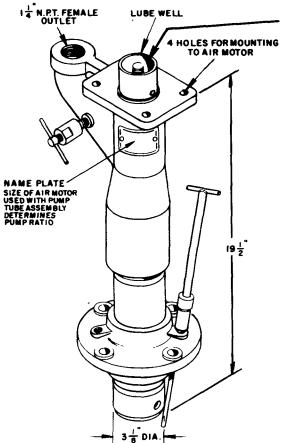

IT IS DANGEROUS TO OPERATE THESE

Models 2104, 2124, 2144. 2164

Series C

GLAND PACKING LUBE WELL

Many materials such as ink, undercoating, buffing compounds etc., display a tendency to build up and dry out on the Pump Rod. These hard dried out materials cause the Gland Packings to wear out rapidly and leakage results. If the material can be prevented from drying and hardening on the Pump Rod the Gland Packings can be expected to render normal amount of service.

The Lube Well should be filled with a fluid compatible with the material that is to be pumped. This fluid will prevent the material from drying out on the Pump Rod and becoming abrasive.

The Lube Well is accessible for inspection and filling by removing the Power-Master name plate from the side of the Air-Motor.

CAUTION. Do not fill Lube Well to full capacity as the reciprocating movement of the Air Motor Piston Rod may draw the fluid into the Air Motor.

MODEL NO.	POWER-MASTER AIR MOTOR	PUMP TUBE	RATIO
2104	82737	83604	6:1
2124	82895	83604	9:1
2144	82730	83604	18:1
2164	82736	83604	36:1

83604 PUMP TUBE ASSEMBLY

SERVICE OF LOWER PUMPING UNIT

Loss of volume and pressure or continuous operation of pump when not in normal use indicates:

- 1. Material supply in drum may not be adequate.
- 2. Air supply may not be adequate. Check setting of air regulator of air supply line.
- Pump may operate on the down stroke only, due to material by-passing around the 14647 Check. Inspect 14647 Check, 14742 Check Bushing, 34529 "O" Ring and 34425 "O" Ring for wear. Replace parts if necessary.
- 4. Pump is operating but not dispensing material. Ball Check in Foot Valve is not seating. Inspect Ball Check and Seat for foreign particles or wear. Replace parts if necessary.
- 5. Material by-passing "U" Cup Packing in Gland Assembly. Inspect "U" Cup Packing and replace if necessary.
- Piston Rod may be scored, pitted or worn. Replace Piston Rod.
- 7. Dirt or other foreign material may be lodged between the 14647 Check and 14742 Check Bushing. Inspect seating surfaces of these parts, and if pitted or rough, either refinish the surfaces or replace the parts.

REPAIR PARTS LIST			
Part No.	Description		
11320	Coupling Adapter		
14195	Check Seat		
14201	Plunger		
14647	Check		
14742	Check Bushing		
14810	Adapter		
34414	O-Ring		
34420	O-Ring		
34425 34427	O-Ring (Polyurethane)		
34427 34429	U-Cup Packing (Polyurethane) Tetraseal
