

BARE REEL

Models 84696 84696-1 Series "C"

MAX. WORKING PRESSURE - 1000 PSI

INSTALLATION

The guide arm may be positioned in $22-1/2^\circ$ increments as shown above. For ease of operation and increased hose life, the guide arm should be positioned to minimize hose flexure as the delivery hose passes through the roller outlet.

Three hex head screws must be used to securely attach the guide arm. The hose clamp must be relocated if the guide arm is in position "B" or "C" in the illustration above. Refer to bare reel drawing for hose clamp locations
