## 5852 HYDRAULIC COUPLER

### WIPE FITTING CLEAN BEFORE LUBRICATING

Push COUPLER on to FITTING at a slight angle, then center COUPLER on FITTING. COUPLER JAWS grip FITTING HEAD forming a tight seal when LUBRICANT pressure is developed by the LEVER GUN. To remove COUPLER turn at slight angle to release grip of COUPLER JAWS. For replacement JAWS order No. 82154 KIT which contains 6 No. 45241 JAWS.

The Model 1292 PUMP is manually operated to dispense grease from a 25 or 35 pound ORIGINAL CONTAINER.

The DRUM COVER is adjustable for various height CONTAINERS. A CLAMP, 45859, is provided to secure PUMP to DRUM COVER by tightening the THUMB SCREW, 50702.

Three THUMB SCREWS, 66130, hold the DRUM COVER to the CONTAINER.

## OPERATING INSTRUCTIONS

Raise PUMP HANDLE until a slight resistance to the upward movement of the HANDLE can be felt. (Position "B"). To insure maximum lubricant delivery, the full pumping range from position "B" to the bottom stop, (position "C") should be used.

## AUTOMATIC PRESSURE RELEASE

The slight resistance felt when the PUMP HANDLE is raised to position "B" indicates the venting range. Venting range is between positions "A" and "B."

Before removing COUPLER from FITTING, after lubrication is completed, raise PUMP HANDLE to position "A". This opens a CHECK VALVE which allows the lubricant to drain from HOSE, through the PUMP TUBE and back into the CONTAINER.

## SERVICE PARTS

PART	QUAN.	DESCRIPTION	PART	QUAN.	DESCRIPTION	PART	QUAN.	DESCRIPTION
5852	1	Hydraulic coupler	34261	1	Coupler packing	55035	1	Spring
