Series "E"**

**MOUNTING DIMENSIONS
(Pump mounting flange)**

**84299
DRUM COVER & TIE ROD ASSEMBLY**

Both Model 81482 and Model 84291 are designed to be used with all Power-Master Drum Pumps for mobile installations where it is desirable to keep dust and water from entering the drum, and to keep the drum contents from sloshing out when traveling over rough terrain.

Each consists of a drum cover assembly and a Model 84273 Pump Mounting Flange Assembly. Interfaces are gasketed between the drum and drum cover; pump outlet body and pump mounting flange; drum cover and pump mounting flange; drum cover and cover plate.

Earlier model Power-Master drum covers which use the 40231 Pump Mounting Flange may be updated by ordering the 84273 Pump Mounting Flange Assembly and a drum cover sealing strip.
